

**REMARKS**

This amendment is in response to the Examiner's Amendment to the title of the present application as indicated in the Notice of Allowance mailed April 3, 2008 ("Notice of Allowance"). (*See Notice of Allowance*, page 2.) Applicants' respectfully submit that the title as amended herein is clearly indicative of the invention and more clearly puts the public on notice of the subject matter of the present application. For example, the title proposed by the Examiner in the Examiner's Amendment recites only "A SYSTEM". However, the present application includes claims directed to both a system and a method. Therefore, the title proposed herein which recites "System and Methodology for Adaptive Load Balancing with Behavior Modification Hints" is clearly more indicative of the claimed invention.

For at least the foregoing reasons, entry of the amendment to the title of the present application is respectfully requested. The Examiner is invited to contact the undersigned by telephone if it is believed that such contact would further the examination of the present application.

Respectfully submitted,

Hickman Palermo Truong & Becker LLP

Date: July 1, 2008
